

Building Future Leadership: A Coastal Sustainability Value Chain

Objectives

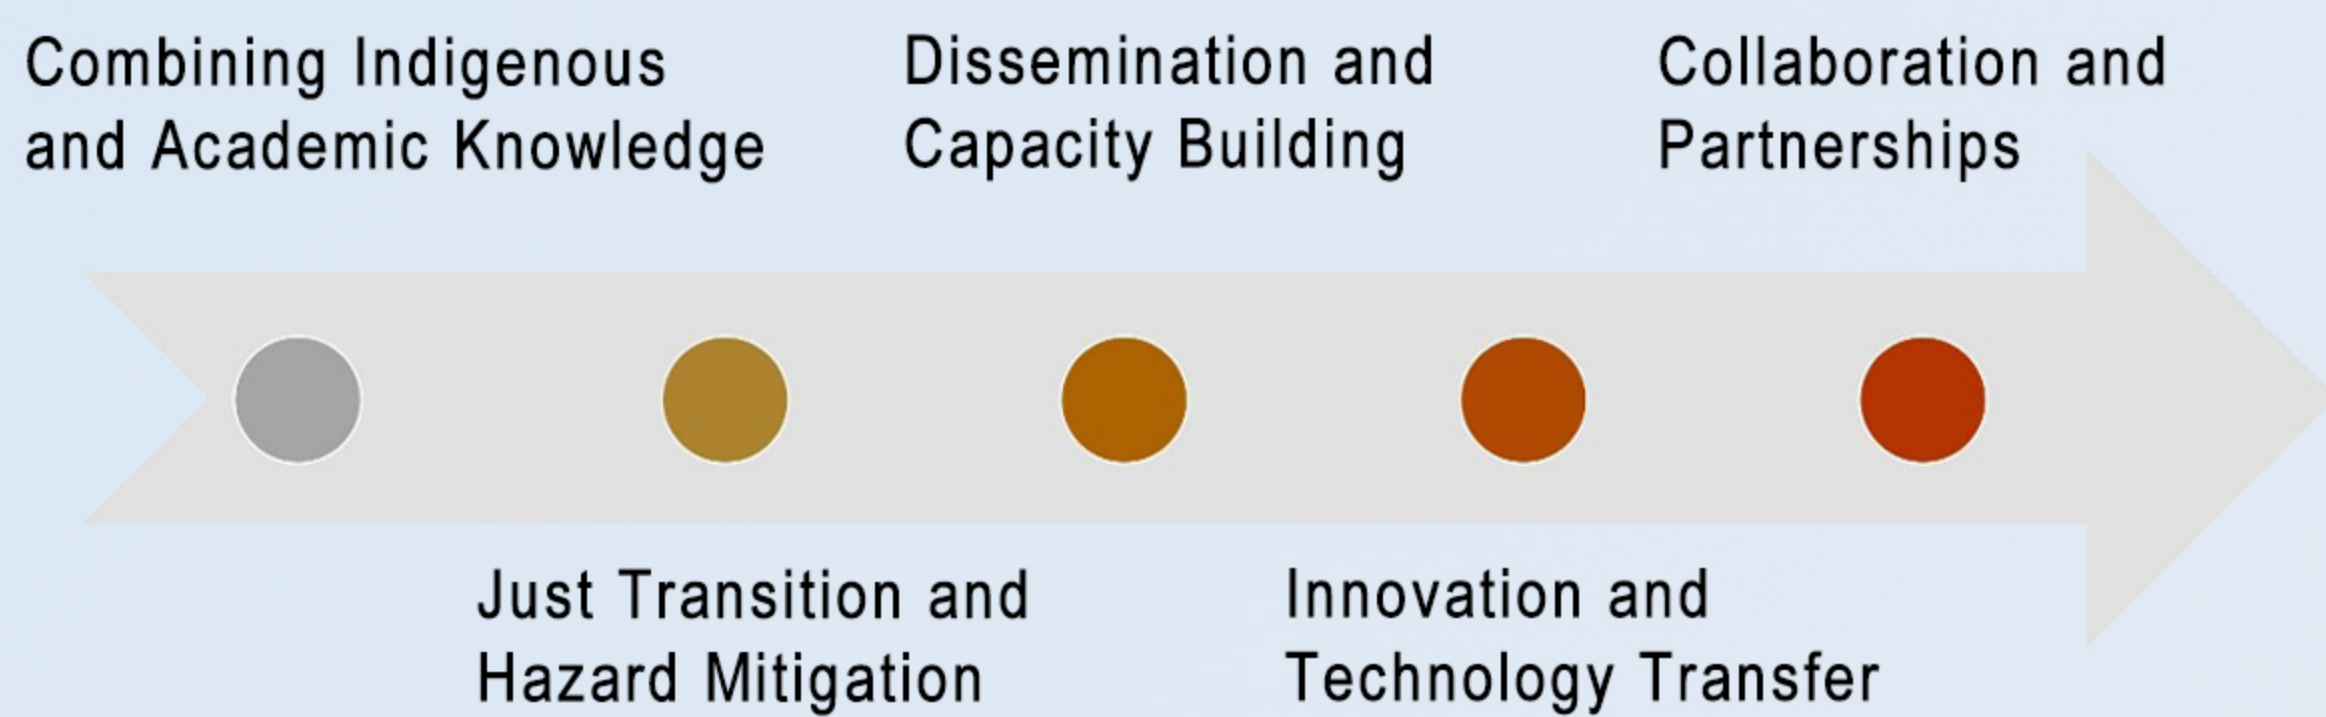

-  Foster collaboration, knowledge exchange, and leadership in coastal management.
-  Enhance skills and connections among future coastal leaders.
-  Empower the next generation to drive sustainable coastal decision-making.

Just Transition and Hazard Mitigation

Workshop Series

A Coastal Sustainability Value Chain

Combining Indigenous and Academic Knowledge

Bridge the gap between academic research and data collection and Indigenous-led methods of knowledge gathering.

1. Just transitions to resilience for resource-dependent coastal communities

Explore what a just transition entails for coastal communities globally.

2. Train-the-trainer session

Equip individuals with community-based expertise in coastal hazard risk reduction and climate-resilient development.

Dissemination and Capacity Building

Equip ECOPs with the skills and knowledge necessary to shift mainstream narratives and integrate ocean literacy into various sectors.

Building Future Leadership: A Coastal Sustainability Value Chain

Innovation and Technology Transfer

Build capacity among ECOPs and industry players by sharing skills in multidisciplinary research, education, and innovation to influence policy-making in the blue economy.

Collaboration and Partnerships

Cultivate practical skills essential for scientists engaged in transdisciplinary research.

Collaborators

- A global, multidisciplinary consortium: scientists, Indigenous leaders, policy experts
- Strong ties to UN Decade of Ocean Science

Anthropocene Coasts

Expand the Network

- Apply to participate in our workshops and training programs.
- Partner with us to co-host events, provide resources, or contribute research expertise.
- Join the conversation by engaging with us on social media and attending global sustainability forums.
